Employer (2) N/A		Job Title		Dates Employed
Work Phone		Starting Pay Rate		Ending Pay Rate
Address	City		State	Zip

Employment Test

PART I: Please solve and type your answers.

.89 + .79 + 3.39 + 2.79 =   7.86   10.00 - 4.59 =   5.41   35.25 - 33.08 =   2.17

PART II: For the following questions, state your answers in terms of bills and coins.
Ex: $4.58 = 4 dollar bills, 2 quarters, 1 nickel, and 3 pennies

1. If a customer's order is $13.58 and he/she gave you a $20.00 bill, what is his change?

   $6.42 = 6 dollar bills, 1 quarter, 1 dime, 1 nickel, 2 pennies.

2. If a customer's order came to $6.22 and he/she gave you $20.25, what is the change?

   $14.03 = 14 dollar bills, 3 pennies.

PART III: Answer the following questions in complete sentences.

1. A customer complains that he was short changed by your receiving only $0.13 change from $2.00 instead of $0.31. What would you do?

   First, I would apologize for the miscount in change and look at the amount I needed to give them. Then, I would give the amount they need.

2. Which do you consider more important as far as a company is concerned - courteous, prompt service or a quality product? Explain.

   I consider being courteous is important as far as a company is concerned because the product could be good, but if the workers are not kind to the customer, the customer is not likely to come back as they didn't enjoy their experience.
